

## QUEENSLAND INSURANCE INDUSTRY TO BENEFIT FROM BAY BUILDING SERVICES NEW GOLD COAST OPERATIONS

Queensland's insurance industry will benefit following the opening of Bay Building Services on the Gold Coast in August 2009.

Since commencing operations in South East Queensland in August 2007, Bay Building Services has been delivering excellence in insurance repairs and building a reputation as one of the region's most professional, proficient and capable insurance builders.

Operations are currently being coordinated from its office in Coopers Plains in Brisbane. Bay Building Services Operations Manager for QLD said today "Establishing an additional base on the Gold Coast will allow us to offer our Gold Coast and Northern NSW clients better turn-around time on all our jobs. Most importantly, a permanent presence on the Gold Coast will allow us to attend to emergency circumstances quicker, and ultimately reduce further loss and unnecessary additional cost to our clients."

Bay Building Services first commenced operating in the state of Queensland when it temporarily established operations in Innisfail following Cyclone Larry in early 2006.

Recognised in Victoria as one of the State's leading insurance builders, Bay Building Services specialises in insurance repairs to domestic, commercial and industrial property. The company's key clients include the nation's largest adjusting and insurance firms. Bay Building Services' head office in South Melbourne supports its operations centres in Box Hill, Geelong, Bendigo and Traralgon.
