6/ ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Wear appropriate personal protective equipment and clothing to minimise skin/eye exposure and inhalation of vapours. Avoid contact with spilled or released material. Shut off leaks, if possible without personal risks. Isolate hazard area and deny entry to unnecessary or unprotected personnel. Remove all sources of ignition in the surrounding area. Ventilate contaminated area thoroughly.

SAFETY DATA SHEET

Substance name: WATER-BASED DEGREASER

6.2 Environmental precautions

For small spills (< 1 drum), dilute with water and mop up, or absorb with dry inert material, and place in an appropriately-labelled, sealable container for product recovery or safe disposal.

For larger spills (> 1 drum), transfer by means such as a vacuum truck to a salvage tank for recovery or disposal. Retain as contaminated waste.

Allow any residues to evaporate or use an appropriate absorbent material and dispose of safely.

7/ HANDLING AND STORAGE

7.1 Precautions for Safe Handling

Avoid breathing vapours. Do NOT ingest. Avoid contact with skin, eyes and clothing. Wash thoroughly after handling. Do not eat, drink or smoke in contaminated areas. Handle and open containers with care in a well-ventilated area. Ensure that the workplace is ventilated such that the Occupational Exposure limit is not exceeded. Do not empty into drains.

7.2 Conditions for Safe Storage, Including Any Incompatibilities.

Store in a cool, well-ventilated area, away from sunlight, ignition sources and other sources of heat. Do not store near strong oxidisers.

8/ EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 Exposure control measures

From National Occupational Health & Safety Commission (NOHSC) Worksafe Australia -

Sodium Hydroxide: 2mg/m³ (peak) TWA

2-Butoxyethanol: 96.9mg/m³ (20ppm) TWA, 242mg/m³ (50ppm) STEL

Alkaline salts: 10mg/m³ in respirable mists

SAFETY DATA SHEET

Substance name: WATER-BASED DEGREASER

8.2 Biological monitoring

No biological limit allocated.

8.3 Engineering controls

Ensure that adequate ventilation is provided. Maintain air concentrations below recommended exposure standards. Avoid generating and inhaling mists and vapours. Keep containers closed when not in use.

TWA (Time Weighted Average): The average airborne concentration of a particular substance when calculated over a normal eight-hour working day, for a five-day week.

STEL (Short Term Exposure Limit): The average airborne concentration over a 15 minute period which should not be exceeded at any time during a normal eight-hour workday.

8.4 Biological Monitoring

No biological limit allocated.

8.5 Individual protection measures

Eye and Face protection	Safety glasses with side shields, chemical goggles or full-face shield as appropriate should be used. Final choice of appropriate eye/face protection will vary according to individual circumstances ie. methods of handling and engineering controls and according to risk assessments undertaken. Eye protection should conform with Australian Standard AS/NZS 1337 – Eye Protectors for Industrial Applications.
Skin protection	Use solvent resistant gloves, nitrile for longer term protection or PVC and neoprene for incidental splashes. Wear appropriate clothing (eg. long coveralls) including chemical resistant apron where clothing is likely to be contaminated.
Respiratory protection	If work practices do not maintain airborne level below the exposure standard, use appropriate respiratory protection equipment. When using respirators, select an appropriate combination of mask and filter. Select a filter for organic gases and vapours (boiling point > 65°C). Respirators should comply with AS1716 or an equivalent approved by a state/territory authority.
Thermal hazards	Not applicable.
